

MARCH 2007 NREMT-INTERMEDIATE/85 REREGISTRATION PROCESS

The National Registry of EMTs (NREMT) has changed the process by which they recognize reregistration at the EMT-Intermediate/85 level, however NH NREMT Intermediate/85s must complete the same refresher process as in past years. **This document is to clarify that process.** Without exception, the New Hampshire Bureau of EMS (NHBEMS) continues to require that all licensed EMT-Intermediate/85s attend a formal 24 hour EMT-B refresher course; successfully complete a NH BLS Practical Examination; complete an additional 12 hours of ALS continuing education**; and an additional 36 hours of continuing education. Disregard the NREMT form related to Mandatory & Flexible Core topics. The following steps are necessary for re-registration for EMT-Intermediate/85s by March 31, 2007:

1. Actively working within an emergency medical service, rescue service, or patient health care facility using his/her ALS skills;
2. Complete all educational requirements prior to the March expiration date;
3. Complete the re-registration report in its entirety and submit the completed report by the March expiration date;
4. Complete a NHBEMS-approved 24-hour EMT-Basic Refresher Training Program (RTP);
5. Complete a NHBEMS-approved EMT-Basic Practical Exam;
6. Complete 12 hours of ALS continuing education**;
7. Obtain CPR certification at the appropriate level current to your March expiration date;
8. Complete 36 hours of additional continuing EMS related education as outlined in Section II of this document;
9. Maintain skills as verified by your Physician Medical Director (requires signature on the NREMT re-registration report validating competency of skills).
10. Complete the NREMT-I 2007 Re-registration Form as described below:
 - Section 1A: Intermediate Refresher 36 hours: attach a legible photocopy of NH EMS "state seal" RTP Certificate of Completion **AND** attach a separate piece of paper listing 12 hours of ALS education** by date, topic and total number of training hours received, and annotate how the education was delivered (i.e. classroom in-service training, video training, computer etc.);
 - Section IB: CPR Certification: Include a legible photocopy of a current CPR card (expiration date beyond 5/05) **OR** note expiration date & verifying signature on re-registration form;
 - Section II: 36 additional hours of EMS related continuing education. List by date, topic and total number of training hours received and annotate how the education was delivered (i.e. classroom in-service training, video training, computer etc.) If completed through distributive education you must include the approval number from CECBEMS. Include training only up to 36 hours total. **Section II does not include the 12 hours of ALS outlined in Section 1A;**
 - Section III: Verification of Skill Maintenance: check the appropriate method for skills verification;
 - Signature Area: Obtain EMS Medical Director's signature from the primary Unit's Medical Resource Hospital **AND** Obtain appropriate primary Unit authorized signature.

Note: Re-registration by the NREMT only continues your NREMT-Intermediate/85 registration. To relicense as a NH EMS provider, complete the 1-page NH EMS Provider application, attach a legible photocopy of the new NREMT-I/85 wallet card and current CPR card and submit the application to the NHBEMS.

If you have any questions, please contact Eric Perry, Education Coordinator at (603) 271-4568, or Vicki Blanchard, ALS Coordinator at (603) 271-4568.

** Beginning January 1, 2006, the NH Division of FST & EMS "EMT-Intermediate Training Module" can be used as the 12 hours of ALS continuing education.
